

Dear Intelligarde -

I am very pleased with the performance of the Intelligarde K-9s and their Handlers. The Handlers are very professional and interact well and with patience with our employees who want to know a little more about the K-9s. Employees are reassured when they see the K-9s working. They feel the likelihood of a vehicle slipping through with explosives is non-existent.

Even truck drivers have commented that they feel better knowing their rig has been sniffed by the Intelligarde K-9. They feel more confident that someone has not planted a bomb in the trailer that they don't know about (especially trucks coming from the US).

We will continue with the use of K-9s two or three times a week for 3 hours each visit. I had some WW Corporate Security visiting this week from our parent company in the USA. They agree with the strong positive affect the Intelligarde K-9s have as an effective deterrent.

Sincerely,  
Security Specialist
